- The dual main businesses of "agricultural materials + chemical industry" have developed in parallel, and refined management has brought about performance improvement.** The company is mainly engaged in the domestic and foreign trade distribution business of chemical fertilizer and pesticide products, and the production and sales of self-owned brand compound fertilizers, pesticides and fine chemical products. In the first three quarters of 2022, the company achieved revenue of Rmb14.283bn, a year-on-year decrease of 4.32%; the net profit was Rmb514 mn, a year-on-year increase of 15.14%; The recurring net profit was Rmb457mn, a year-on-year increase of 6.81%. Among them, the revenue in the third quarter was Rmb3.794bn, a year-on-year decline of 25.50%; the net profit was Rmb53.49mn, down 47.05% year-on-year; the recurring net profit was Rmb44.25mn, down 53.84% year-on-year. The improvement in the performance of the first three quarters was mainly due to the company's efforts to improve the company's operation quality, the stable development of various businesses, and the steady growth of operating performance.
- Chemical business: New projects have been successfully put into operation, and m-cresol and menthol are expected to contribute considerable increments.** M-cresol, thymol and menthol developed and produced by Haihua Technology, a subsidiary of Haihua Technology, have successively broken the long-term foreign technology monopoly and realized import substitution, and are currently the only enterprises in the world that have a core industrial chain from "m-cresol-thymol-L menthol". According to the data of the General Administration of Customs, the average unit price of China's m-cresol exports in September 2022 was \$14.07/ kg, a year-on-year increase of 67.57%; the average unit price of menthol exports was \$16.50/kg, up 0.04% year-on-year. According to the announcement, in 2022, Hihua Technology's 10,000-ton m-cresol expansion project will be officially put into production in August, and the 3,000-ton menthol project will be officially mass-produced in June. We believe that with the gradual increase of new production capacity of m-cresol and menthol of Hihua Technology, it will further consolidate its leading position in the cresol industry chain and contribute considerable performance increment.
- Agricultural input business: steady development, sales scale and profit level are expected to further increase.** The company is the first listed company in China's agricultural material circulation industry, a demonstration enterprise of the "new network project" of supply and marketing cooperatives, and the comprehensive competitiveness of the industry ranks first in the province and fourth in the country. According to the announcement, the company's fertilizer business production and sales are booming, currently has its own brand compound fertilizer annual production capacity of 1.25 million tons, monoammonium phosphate annual production capacity of 200,000 tons, under construction 300,000 tons / year compound fertilizer project will be put into production in 2022, the total annual fertilizer sales of more than 4 million tons. The company's pesticide business is mainly as a national platform agent for Syngenta, Bayer and other internationally renowned pesticide enterprises, controlling high-quality pesticide import resources, and the annual sales volume of pesticide formulations exceeds Rmb2.5bn, ranking among the top three in the country.
- Earnings forecast and investment rating.** We estimate that the company's NPATs in 2022-2024 will be Rmb610mn, Rmb857mn, and Rmb1019mn respectively, the corresponding EPS in 2022-2024 will be Rmb0.64, 0.90, Rmb1.07 per share. With the valuation of comparable companies, we value the company at FY22E PER of 19x with a target price of Rmb12.16. We initiate with a "OUTPERFORM" rating.
- Risk:** Raw material prices fluctuate sharply, downstream demand is less than expected, and technology is spreading
